## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Myers.

Myers (see figs. 1-5 and cols. 2-4 ) discloses a magnetic assembly for being received in an armature slot (4) for retaining armature coil (6) components therewithin, said assembly having a longitudinal dimension generally parallel to an axis of said armature slot and a thickness dimension in a direction generally perpendicular to said longitudinal dimension and aligned in a depth direction said armature slot, said magnetic assembly comprising: a magnetic armature wedge structure including a molded body of a resin material having a magnetic material embedded therewithin, said magnetic material being embedded in said molded body so as to be disposed along substantially an entire length thereof.

Regarding claim 2, Myers disclose a magnetic wedge slide adjacent said magnetic armature wedge structure, between said magnetic armature wedge structure and said armature

coil components, said magnetic wedge slide being formed from resin having ferromagnetic particles distributed therethrough.

Regarding claim 10, Myers discloses said magnetic material embedded in said molded body of said magnetic armature wedge structure comprises a magnetic core made from mixing resin and ferromagnetic particles (col. 2, lines 40-50).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Meyers.

Myers discloses the claimed invention except for the magnetic core shape circular cross sectional shape . It would have been an obvious matter of design choice to change the magnetic core (14) of Myers from rectangular into circular shape, since such a modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

***Allowable Subject Matter***

5. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Election/Restriction***

6. Applicant's election with traverse of claims 1-3, and 10-11 in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the claims 2 and 3 are genetic of all the species. This is not found persuasive because claims 2 and 3 are dependent claims of genetic claim 1, claims 4-9 are distinct species which has a separate status from the elected species E of claims 10-11.

The requirement is still deemed proper and is therefore made FINAL.
